#### **DETAILED ACTION**

1. Pursuant to the entry of the amendment of February 4, 2010, the status of the claims is as follows: Claims 1-11 and 16-24 are pending. Claims 16-24 are new.

#### ***Response to Amendment***

2. The objection to claims 4-14 is moot in view of applicants' amendments.
3. The rejection of claims 1-3 and 15 under 35 U.S.C. 112 second paragraph is moot in view of applicants' amendments.

#### ***Claim Rejections - 35 USC § 102***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 1-11 and 16-24 are rejected under 35 U.S.C. 102(b) and (e) as being anticipated by PCT Patent Publication WO 96/27039 and US 2007/0010154 (hereinafter referred to collectively as "Claeys").

#### **Regarding Independent claims 1 and 16**

Claeys discloses strengthening material suitable for reinforcement in composites and laminates produced therewith, said strengthening material comprising at least one singular thickness-providing layer in the form of a knit of glass fiber, and at least one singular strengthening layer connected to the singular thickness providing layer. See abstracts of '039 and '154. In addition, Claeys discloses that the layers are fastened together by a polyester thread. See '154 [0018] and '039, page 4, line 15. The examiner equates the polyester thread with the present claimed monofilament. In addition, Claeys discloses the formation of laminates. Note [0018] and [0024]-[0025].

The requirement for and "at least one monofilament" does not distinguish the knit glass fibers of Claeys. Knit glass monofilaments are fully embraced by the prior art teachings.

Accordingly, Claeys anticipates the invention of present claims 1 and 16.

**Regarding dependent claims 2-11 and 17-34**

Regarding claims 2 and 18, Claeys discloses a polyester thread. See '154 [0018] and '039, page 4, line 15.

Regarding claims 3-4, and 20, Claeys discloses a thickness of 1-10 mm. See '154 [0007] and '039, page 2, lines 10-11.

Regarding claims 5-6, 9, and 21-23, Claeys discloses a weight of 200 g/m2. See [0023].

Regarding claims 7 and 24, Claeys discloses a strengthening layer that can be glass fibers. See [0024].

Regarding claims 8, 10, and 19, Claeys discloses that the strengthening layer can be of the type contemplated by applicants, such as membranes or non-wovens and is connected to the thickness layer by means such as sewing or knitting.. See [0016] and [0017].

Regarding claims 11, and 17, Claeys discloses materials comprising two strengthening layers and one thickness providing layer sandwiched between these two layers. See [0023] and [0024].

**Examiner's conclusion**

The teaching of Claeys anticipates the invention as claimed in present claims 1-11 and 16-24.

***Response to Arguments***

6. Applicant's arguments filed February 4, 2010 have been fully considered but they are not persuasive.

Applicants argue that Claeys does not teach or suggest a strengthening material comprising at least one singular thickness providing layer in the form of a knit comprising glass fibers and at least one monofilament and at least one strengthening material layer connected to the singular thickness providing layer.

The examiner disagrees. The knit glass fiber of Claeys would embrace monofilaments. Applicants have not defined their monofilament such that it would distinguish over the monofilament in a knit strand, yarn, or fiber.

No claims are allowed.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
